Thinkers50 identifies, ranks, and shares the very best in management ideas.

Every year we publish our list of 30 thinkers to watch out for in the coming year.
THINKERS50 RADAR 2022

Announced every January, the Thinkers50 Radar list of 30 thinkers to watch in the coming year is one of the most eagerly anticipated events in the Thinkers50 calendar. It is an eclectic mix of people who have crossed our personal radar or been nominated by members of the Thinkers50 community. We are delighted that for 2022 Deloitte has now joined us as our Radar partner.

The Radar Class of 2022 is an exceptional group of thinkers, whose ideas, hard work and passion we believe can make a real difference in the world. They may not have all the answers, but they are asking important questions about the business world and the sort of society we want to live in.

At Thinkers50, we believe in diversity, inclusivity, and equity. Our Radar list is a celebration of those values. We not only welcome but positively seek out the rainbow spectrum of thought that comes from seeing the world from multiple perspectives and backgrounds.

The Thinkers50 Radar Class of 2022 includes a Sri Lankan-born Irish computer scientist, a trailblazing US leadership coach for young women, a Norwegian expert on superclusters, a British-born champion of transformational justice, a crisis management specialist from Sierra Leone, and the Canadian innovator of the year.

At Thinkers50, we believe that ideas can change the world. We hope you enjoy finding out more about the Radar Class of 2022 – and how their work can make an impact in your organization and beyond.

ANTONIO ALOISI

NATIONALITY / COUNTRY OF ORIGIN: Italy

BIO: Marie Curie fellow and assistant professor of Labour Law at IE Law School, Madrid. Previously, postdoctoral fellow at the European University Institute, Florence. PhD in Business and Social Law from Bocconi University, Milan.

IDEAS: Antonio’s research focuses on the impact of digital innovation on labour regulation and social institutions. His Boss Ex Machina project aims to map new practices of algorithmic decision-making and assess the adequacy of existing legal frameworks for enabling sustainable, data-driven workplaces. It is funded by the EU Horizon2020 programme.

CONTENT: Your Boss Is an Algorithm. Artificial Intelligence, Platform Work and Labour (with Valerio De Stefano, 2022). Using examples from across the EU, the UK and the US, this book provides a compass to navigate the era of radical advancements such as the gig-economy, algorithmic management and digital surveillance.

AZEEM AZHAR

NATIONALITY / COUNTRY OF ORIGIN: UK

BIO: Azeem is the creator of Exponential View, a newsletter on the intersection of technology, business and society, and an active investor. Previously he founded a number of technology startups. Azeem began his career as a journalist and has an MA in PPE from Oxford University.

IDEAS: Azeem argues that we are moving into the Exponential Age, a period where accelerating technologies will refashion our political economies. As these changes occur, our economic, political and cultural institutions will need to adapt – but will struggle to do so. The result is the ‘exponential gap’, a chasm that must be closed for inclusive and equitable progress.
